

## Obtaining certificates for excellent business operators in terms of safety

Nine business footholds and five companies of the Keihin Co., Ltd. group that operate trucking services have been certified as excellent business operators in terms of safety by the Japan Trucking Association (JTA), which has been designated by the Ministry of Land, Infrastructure, Transport and Tourism (MLIT) as an organization that work nationwide to optimize transport with cargo transport vehicles.

The JTA began providing the certification in fiscal 2003 to assess business operators' safety properly, and certify and publish safe business operators to allow users to choose safe operators more easily and develop environments to raise the awareness of having to improve safety for the trucking service industry.

We will continue to operate transport services, doing activities to protect the earth's natural environment and taking safety into full consideration.
