Opening Motor Vehicles Inspection Facility

Keihin opened a facility at the Port of Yokohama's Daikoku Pier for the Road Worthiness Inspection (RWI) of used motor vehicles for export to Uganda and Zambia.

Advantages customers can gain exclusively from us:

To transport the vehicle from your yard or auction sites to our facility in Daikoku Pier directly, local transportation cost can be saved.

Also lead time to when ships are loaded can be shorter.

Launching of Web-based Service for Search of Inventory And Loading Information

Customers can view on our Website detailed pictures of automobiles taken when delivered into our the inspection facility at the Daikoku Pier as well as browse inventory information on customs clearance and ship loading.

Providing information on a timely basis, we support customers' business.

[illegible]

We support complicated export procedures for motor vehicles with elaborate services.

Export procedures

Overland transport from various auction and other sites

Delivering-in of motor vehicles

We have third-party specialists conduct inspections on exterior and interior conditions. We store and manage customers' valuable motor vehicles with a full round-the-clock security system.

POINT1 Keeping motor vehicles at bonded yard

Three export bases:
Daikoku, Higashi Ogishima

Export declarations & approval

Required documentation
•Shipping Instructions
•Commercial invoices
•Export certificates

Use of PCCs

Delivering-out formalities

Loading vessels

Ocean transportation

Use of container vessels

Vanning

Delivering-out of containers

POINT Service advantages that only we can offer

We can handle total consistent services (receiving car at yard, clear customs, stevedoring and ocean transportation).

We have capacities of storing 5,000 units at three facilities in the port of Yokohama (Daikoku) .

1 Various services and a reliable storage system

In partnership with Japan Export Vehicle Inspection Center Co.,Ltd. (JEVIC), we provide the following services for vehicles exported by ocean from Yokohama at our Daikoku Yard to meet the special regulations of these countries.

- Quarantine inspections for vehicles exported to New Zealand
- Cleaning for vehicles exported to Canada

When motor vehicles are delivered into our yards, We have third-party specialists conduct inspections on exterior and interior conditions. Data on exterior conditions and interior accessories, together with customers' names and vehicle identification numbers are managed with our own system.

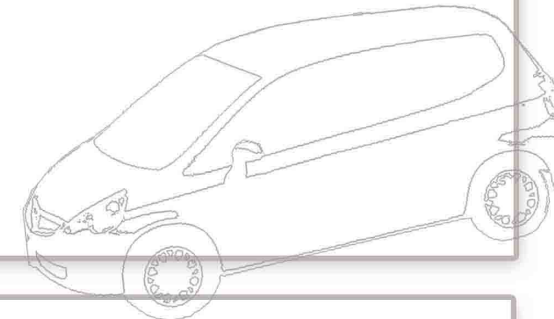

2 Safe and effective container transport developed with our own experience

Our vanning activities, which have been developed through the experience that we have acquired over a long period of time, transport customers' valuable motor vehicles to destinations safely.

Vehicles are fixed in a container with metal angles and reinforced belts.

FAQ Frequently asked questions by customers

Q Can you take pictures of motor vehicles for export?

A Yes, we can. We take pictures of interiors and exteriors.

Q Can you transport immobile vehicles by ship?

A Yes, we can. They can be transported in containers.

Q Is it possible to accept inner cargoes ?

A As it depends where they are transported and what shipping companies will handle, please inquire with our staff?

Q As we have never exported motor vehicles, we don't know if we can properly complete formalities and other necessary procedures.

A Leave everything to us. We have our dedicated staff explain in details steps to take to fill in necessary forms and complete other formalities as well as provide detailed information on line-ship schedules and regulations.

Shouldyou have any questions, feel free to ask our staff.

Q When you load containers, how do you fix motor vehicles?

A We use metal angles, reinforced belts (refer to the picture), clasps, and other devices.

General logistics service provider THE KEIHIN CO.,LTD.

We have been working single-mindedly on logistics systems since our founding in 1947 as Keihin Ware house Co., Ltd.

We have also met demand for internationalization, information and generalization ahead of others as the time have changed drastically, making increasingly higher achievements as a general logistics service provider.

What we are pursuing now is logistics systems of even higher quality. We aim to provide logistics services to satisfy demand of all people for goods on a real-time basis and those tailor-made for each product.

We deliver that much-valued convenience that no one else can offer.
